coke.stuyck@gmail.com

Designer with 10+ years of experience in digital products and web development, transitioning to Data Science and Artificial Intelligence. Specialized in optimizing processes and interfaces to improve user experience.

Currently studying the Master's in Artificial Intelligence, I have acquired a solid foundation in Python, data analysis and visualization, model training, evaluation and fine-tuning, LLMs and generative AI, implementation and production deployment. I am interested in continuous improvement methodologies and the possibility of contributing through a multidisciplinary approach in solving real problems, process automation and decision-making.
